## Sports Facilities

### Air Canada Centre, Toronto, Ontario

The 900,000 square foot centre features a 20,000 seat stadium for basketball, hockey, concert or exhibition venues. It includes four concourse levels, numerous restaurants, a Microbrewery, 152 lounge and luxury suites, dressing rooms and other state of the art amenities. Adjoining is a 15 storey 200,000 square foot office tower.

### Ali Sami Yen Stadium, Istanbul, Turkey

This stadium is home to the Galatasary football team, in Turkey. It has a seating capacity of 41,000 and was built on the site of the existing stadium. It features a fully retractable roof, and can instantly be turned into a concert arena. The stadium also includes a ten-storey office building, recreation centre, 125 luxury residential suites, restaurants and multi-level car parking.

### Applebee's Park, Lexington, Kentucky

This state-of-the-art classic baseball stadium design seats more than 6,000 people. Applebee's Park features a video replay and score board, twenty-six luxury suites, various picnic areas, kids' play areas and concession stands.

### Barrie Molson Centre, Barrie, Ontario

This 4,500 seat hockey and concert venue is home to Junior A Barrie Colts. It is an indoor concert and ice show facility.

### BMO Field, Toronto, Ontario

This 160,000 square foot soccer-specific stadium is located on the Exhibition Place grounds in downtown Toronto. It features approximately 20,000 seats in a horseshoe arrangement, with an open-air design. It also includes players' change rooms, work-out and warm-up rooms, press conference areas as well as office space and VIP club areas featuring 500 club seats in the mezzanine above the event area.

### Dufferin Grove Ice Rink

This project involved the installation of new outdoor rinks for hockey and pleasure skating, with a complete change house building.

### First Arena, Elmira, New York

This 14,500 seat twin pad ice facility for the Union Hockey League Elmira Jackals includes 45 private boxes, a restaurant, amenity spaces and a separate practice rink.

### Fort Myers Sports Center, Fort Myers, Florida

This three rink complex is home to Fort Myers' East Coast Hockey League Team. It includes a 10,000 seat main stadium and 28 ten-seat private suites. A 150-seat bar overlooks one end of the arena. This rink is fully air conditioned with desiccant dehumidification systems and can also convert to roller hockey.

### Hershey Centre, Mississauga, Ontario

This 5,300 seat design build facility includes a hockey and concert venue with 27 boxes and 270 additional seating. The facility contains three full service concessions a kitchen serving the boxes and a bar for the club seating. The Hershey Centre is home of the Junior A Mississauga Ice Dogs of The Ontario Hockey League.

### John Labatt Centre, London, Ontario

This design build commission included the complete mechanical design, refrigeration system and design overview of this 10,000 seat hockey and concert venue. It is home to Ontario Hockey League's London Knights.

## Sports Facilities

### Kingston Regional Sports and Entertainment Centre, Kingston, Ontario

This state-of-the-art facility will be used for Ontario Hockey League games and tournaments, concerts, conferences, trade shows and other community events. It will accommodate 5,000 people and will include private suites, club seats, concessions and a restaurant. This building will be certified as a LEED Silver facility.

### Malton Arena

This included the replacement of rink floor and selected refrigeration plant equipment.

### Mississauga Iceland Four Rink Complex, Mississauga, Ontario

This design build commission included design of heating, ventilation and air conditioning systems for rink, change rooms, common areas and concessions. This is a four pad arena complex with three practice rinks and one Olympic rink which was conditioned by two rooftop air handling systems with DX cooling and gas heating.

### MSG Training Center, Westchester, New York

This training center for the New York Rangers, New York Knicks and New York Liberty teams includes one ice rink, 3 ½ basketball courts, associated changerooms and an entrance lobby.

### Ricoh Coliseum, Toronto, Ontario

This design build commission for the 10,000 seat multi-purpose facility is home to the American Hockey League's Toronto Roadrunners and world renowned Royal Winter Fair Equestrian event.

### Rogers Centre, Toronto, Ontario

The Rogers Centre project (formerly Skydome) involved the conceptual design and design management of this retractable roof stadium. It also included the detailed design of the clubhouses, health club, private boxes and kitchen facilities. The entire Rogers Centre development is 12.7 acres (5.14 hectares); 143,000 square feet of exhibit space on field level. The roof, which is the world's first fully retractable roof, is made up of 4 sections that open in a smooth, circular motion and opens or closes in 20 minutes.

### U.S. Cellular Coliseum, Bloomington, Illinois

This 180,000 square foot Coliseum includes seating for approximately 7,000 people for hockey and indoor football games and over 8,000 for concerts. It also includes 24 luxury suites, two large group suites, 800 club seats with a club seat holder lounge, a full service restaurant/bar and community rink. The Coliseum has an adjacent parking deck with 300 parking spaces.

### Vancouver GM Place, Vancouver, British Columbia

This 20,000 seat multi-purpose facility is home to the Vancouver Canucks National Hockey League Team. It features five restaurants and over 80 corporate suites, club seating and lounges.

### Waterloo Millennium Recreation Centre, Waterloo, Ontario

Design build commission included design of mechanical plumbing, heating, ventilation and air conditioning systems for Four pad Olympic size rinks with associated change rooms and support, four gymnasiums, a field house for indoor soccer, fitness and program rooms, figure skating club facilities and a food court.
